

How do you want the Juniors, staff and teachers to notice you as a leader?

I will try my best to be known as a leader by helping others in class, playground and field at all times during playtime. I will also try and keep my work on time so that the year 7's can be the same next year. I will then encourage others to be the same so that they can grow up to be successful. Some kids will think work is a waste of time but I will help them understand that work can actually help you get a stronger mindset and can teach you how to solve problems.

I can also show Kaitiakitanga in the school grounds by picking up rubbish and telling the little kids not to pick the fruits from the tree so that the environment stays neat and tidy. I will have to lead by example whenever the little ones are doing something that they are not to be doing.

I can be a good leader by being respectful to others, which means including them into your activity and study groups. I will always come to school with a positive attitude so kids know that they are safe with a year 8 leader. A leader always shows integrity and is honest with one another. I will have to motivate a group of kids throughout the rough times and celebrate the good times.

I will have to make good decisions which means I will have to think before I say and think about my actions. I can be a good leader by taking responsibility for the sports equipment. A good leader should always show kindness to one another.
